Group 3
PROJECT BIDDING

Our team would like the following projects:
1. Mielki
2. Turner
3. Torunski
4. Persinotto
5. Gagne1

Dear Leanne,

We would like to work on Mielki because we have extensive experience with website design and development using Shopify and Wix. Additionally, our skills include key programming languages used for website building, such as HTML, CSS, and PHP. We also have a bit of experience with modern website development languages and scripting languages such as Angular, JavaScript, NodeJS, and jQuery. Additionally, some of our team members have hands-on experience in

both co-op and regular job experiences with website development.

We are passionate about making this project stand out, turn all our clients' ideas into reality. We excited to create an engaging podcast platform that will be visually appealing. We will also make it well tailored to meet the specific needs of our client, with features that provides a great user experience and keep users coming back.

 Best Regards,
Group 3
